With reference to the certification SGS, Test Report N. 437276/HLL15/0332-2 06th February 2015

Dosage Limit : None

Global migration

We inform you that in accordance with the provisions of Directive 82/711 CEE and by its amendment 93/8 CEE and in accordance with the provisions of the Regulation CE 1935/2004 and by the Regulation N. 10/2011 migration limit should be checked on the final product intended for contact with foodstuffs.

The global migration must be controlled on the final product because it can be influenced by the type of material used, different components, as well as by processing conditions

For this reason, in addition to this certificate on compliance of the components used, we recommend that you perform appropriate tests of global migration on the finished product, so you confirm the suitability of the end product in contact with different types of foods and in various conditions of use final.

Substances subject to LMS or DUAL USE

the product does not contain monomers and or additives for which are provided specific migration limits

the product does not contain additives dual-use (regulated substances for food contact regulations of the UE N. 10/2011 and as food additives by the Rules CE N. 1333/2008 for which are provided specific migration limits.

Compliance for food contact in the European Union

Compliance of the components of the product to European Union law in this case extends to all Member States of the European Union. It is recommended in this regard to take into account any limitations and restrictions provided and reported in the EU

Compliance for food

Versione 1.1 Date 15.06.2015

FILLER MASTERBATCH F30

We find it useful to remind you that any product migration on food should be controlled by you for each application because it may also depend on the type of material used by different components and the manufacturing process.

Our statement is issued only in reference to the above named product supplied in original packaging and does not include any subsequent transformations and processes.

Polyfiller is not able to confirm compliance with the requirements of the laws governing food contact for all the nations that are not expressly stated in this document.

This statement supersedes any earlier version.

The information contained in this document represents the current state of our knowledge.

We believe that they are correct but they are not to be considered as absolute guarantees of the product.

In view of the many factors that can affect the process and the application of our process and the application of our product, the end user has the responsibility to carry out all the necessary checks and assessments and specific to the purpose for which the product is intended .
